### Background

Craig has over 22 years experience in building services consulting in addition to trade experience. He has gained considerable expertise in the consultation, design, documentation and administration a wide range of building electrical services including lighting (internal and external), power systems, structured communication systems, building automation, lightning protection systems, standby generation systems, dry fire detection systems and electronic access control and monitoring systems.

Craig has particular experience in working directly with developers, project managers, architects, principle contractors and sub-contractors to deliver reliable, sustainable and cost effect installations. Flexibility in design, maintaining budgets and practical construction solutions are what Craig brings to any project.
