

Michael Galea BEng (Hons)
Mechanical Engineer

Michael is a mechanical engineer with an expanding knowledge of the building services industry. He has experience in HVAC and vertical transportation deliverables on a wide range of projects such as retail, aged care, residential and educational. His involvement in projects has required him to perform roles from minor to main point of contact.

Michael is also capable of producing high-quality draft-work, with experience in AutoCAD and Revit. He is a young engineer who strives to provide high quality, functional designs to exceed client expectations.
